PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience in web development, specializing in React.js, Next.js, and MongoDB. Proven ability to build responsive, production-ready interfaces and integrate REST APIs within cross-functional, agile teams. Strong foundation in OOP, data structures, and MVC architecture, with a track record of delivering measurable improvements to UI performance and consistency.

TECHNICAL SKILLS

Programming: C++, JavaScript (ES6+), C#, SQL

Frontend Development: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend & Database: Node.js, ASP.NET, MongoDB, SQL Server

Tools & Technologies: Git, GitHub, Postman, Visual Studio Code, Visual Studio, Salesforce CRM

Core Concepts: OOP, Data Structures & Algorithms, MVC Architecture

PROFESSIONAL EXPERIENCE

Jami Partners

Aug 2025 – Jan 2026

Frontend Intern

- Built responsive UIs with React.js and Next.js, and integrated REST APIs for dynamic data.
- Improved UI consistency and performance across multiple modules of a government e-service portal.
- Partnered with backend developers and designers to ship production-ready, accessible features.

Logiciel Services Pvt Ltd

Jun 2024 – Sep 2024

C# Intern

- Built inventory management modules with C#, ASP.NET MVC, and SQL Server.
- Optimized backend logic and database queries, improving system performance and reliability.

SELECTED PROJECTS

Service Desk – Government Services Platform

Tech Stack: Next.js, Node.js, REST APIs, JavaScript

- Developed and delivered a web platform for a consultancy firm, enabling customers to access government-related services in one place.
- Supported key service requests including CNIC renewal, lost passport renewal, electricity bill services, and vehicle registration payments.
- Built a responsive, user-friendly frontend with Next.js and a Node.js backend to process service requests and handle business logic.

IT Inventory Management System

Tech Stack: C#, ASP.NET MVC, SQL Server

- Developed and delivered an inventory management system for an IT company to track and manage computers, laptops, and other IT equipment.
- Implemented the application using MVC architecture with C# and ASP.NET, keeping business logic, data, and UI cleanly separated.
- Designed SQL Server database structures for reliable storage, retrieval, and management of asset records.

EDUCATION

BS Software Engineering

Feb 2023 – Present

Mohammad Ali Jinnah University (MAJU), Karachi

CERTIFICATIONS / LEARNING

- Microservices Architecture – Certified
- Data Structures & Algorithms – Certified
- MongoDB for Developers – Certified
- React.js Development – Certified (Ongoing)
